

Explore public data

Identify business opportunities by discovering insights into companies, plays and completion technologies

VERDAZO enables you to quickly and easily:

- › Understand the production activity and performance of any operator in Canada or the U.S. (leveraging your existing vendor data subscriptions)
- › Generate type-well curves using industry best practices
- › Compare the production performance of companies and plays with an integrated map
- › Assess acquisition opportunities with custom dynamic workflows
- › Perform the most sophisticated interactive statistical completion analysis in the industry (available to subscribers of the Well Completion and Frac Database from Canadian Discovery Ltd.)
- › Understand and manage your Inactive Well Compliance requirements

Verdazo Analytics enables Oil & Gas companies to target efficiencies, optimize performance and add millions to the bottom line. VERDAZO software is purpose-built for Oil & Gas and offers unmatched capabilities for all stages of the well lifecycle. Verdazo Analytics also offers Machine Learning predictive analytics services. Learn why so many companies trust Verdazo Analytics to help them take their businesses to the next level at www.verdazo.com.
